

# Looking for a career where **innovation** is a constant state of mind?

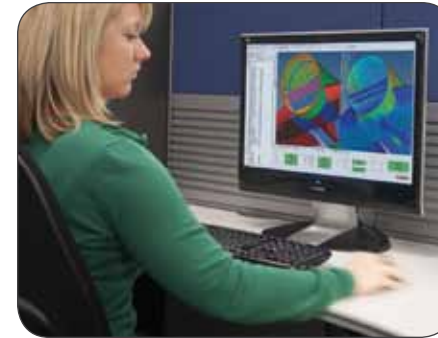

## Think Altair.

At Altair, you can surround yourself with intelligence. As a people-oriented organization, we seek the best and the brightest. Throughout the company, on every project, with each client interaction, we take an entrepreneurial approach to solving problems.

- An industry leader since 1985.
- A track record of high-end software for engineering and computing.
- Enterprise analytics solutions.
- Innovative product design and development.

Follow Altair on:

## You bring talent. We bring rewards.

When you apply your skills, education and experience at Altair, the benefits go beyond career satisfaction:

- Fair, flexible, respectful culture that provides global opportunities for career growth
- Performance-based promotion
- A commitment to healthy work-life balance
- Casual, yet professional work environment
- Employee wellness programs
- Medical, dental and vision insurance

Put your intelligence to work. Join the Altair team.

## Why Altair works for you

"It's the right place to work not just as an engineer, but as yourself. You work with people who share a vision and make you a part of it."

**Michele** | Technical Consultant

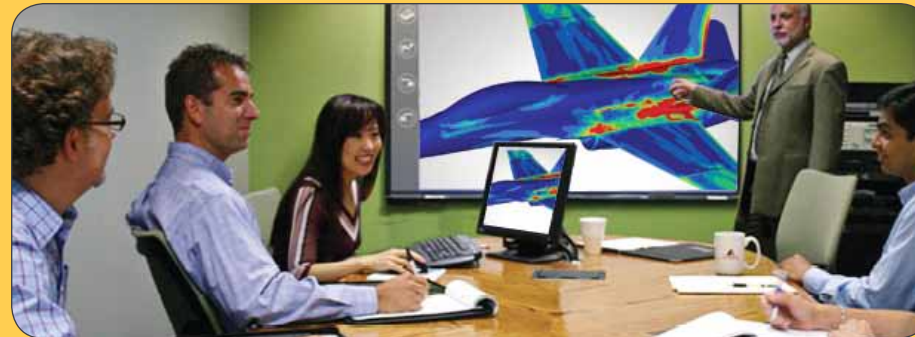

"My job at Altair gives me diversity in experience that would be very hard to find elsewhere. I'm in a position where I can constantly learn and grow as an engineer. The work always changes and I'm never allowed to get bored."

**Nick** | Project Engineer

"The Altair Engineering internship program 'jumpstarted' my career by exposing me to the real-world working environment early in my life. The valuable hands-on experience gained from working with several different business units at Altair complemented my classroom experience, which has tremendously contributed to my growth as a professional."

**Zulfitri** | Account Manager
